

Vehicle GPS Tracking Devices

Stolen Vehicle Recovery Solutions

Track, monitor and recover vehicles with our range of Vehicle GPS Tracking Devices.

From plug-and-play vehicle GPS tracking devices that fit existing OBD ports to more advanced hardwired devices: Increase the likelihood of stolen vehicle recovery with **real-time movement alerts, recovery mode, speed monitoring, and more.**

GPS VEHICLE TRACKING DEVICE FEATURES

High Precision GPS

GPS and GLONASS positioning systems are used simultaneously with a 72 channel high sensitivity receiver (-167dBm) for enhanced accuracy and faster fixes.

Preventative Maintenance

Set proactive maintenance reminders based on distance traveled to reduce trailer downtime and repair costs.

Real-Time Tracking

Vehicle GPS tracking devices remains continuously connected while on the move for real-time location tracking.

Driver Safety & Behavior

Monitor speeding, harsh acceleration, braking, cornering, and more to improve safety and prevent unnecessary wear on vehicles.

Accident & Rollover Detection

Configure accident and rollover alerts triggered by extreme changes in velocity and orientation of vehicles or equipment.

Run Hour Monitoring

Calculate run hours and distance travelled (odometer) to understand and optimize vehicle utilization.

Theft Recovery

Switch to Recovery Mode in the case of theft or loss to activate live-tracking at 30 second intervals for asset retrieval.

Advanced Geofencing

Create custom geofences and alerts if a container enters or leaves specific locations. Geofences can also be downloaded directly to the device for enhanced location-based behaviors.

GPS VEHICLE TRACKING DEVICES

OYSTER

Ultra-rugged, long-life battery-powered GPS tracking device with up to 7 years battery life for asset tracking and management, theft recovery, and more.

BOLT

Compact and affordable vehicle tracking device for real-time vehicle and fleet management

G62

Rugged and robust vehicle, trailer, or heavy equipment tracking device with inputs/outputs, remote immobilization for fleet management, equipment monitoring, driver ID, theft recovery, and more

FALCON

Robust battery-powered or wired GPS tracking device with inputs/outputs, I²C Sensor Interface, and WiFi Positioning for indoor and outdoor asset tracking and sensor monitoring

G120

GPS tracking device and Bluetooth® Gateway with optional Iridium Satellite for out-of-coverage tracking with inputs/outputs, RS-232 Interface, and remote immobilization for fleet management, driver ID, driver safety and behavior monitoring, remote worker safety, theft recovery, and more

DART

Robust and affordable vehicle tracking device with inputs/outputs, remote immobilization for fleet management, driver ID, driver safety and behavior monitoring, theft recovery, and more

QUALITY MATTERS ...

PrismaQuality serves consumers, companies of any size and system developers with IoT – devices, web-tools and mobile applications. From our product range there can be found suitable sensors for almost any kind of customer and for almost any kind of application. As data services and alert generation, we use several types of mapping solutions and wide range of use case tailored platforms. As communication routes, up-to-date IoT – networks, traditional cellular networks and satellite communication networks are all used regularly.
